City of Grover Beach Releases Annual Water Quality Report

Grover Beach, CA – Under the Safe Drinking Water Act (SDWA), the U.S. Environmental Protection Agency requires water systems to provide an annual water quality report to all consumers. The 2020 Consumer Confidence Report (CCR) prepared by the Grover Beach Public Works Department is [now available on the City's website](#). Drinking water supplied to customers of Grover Beach undergoes careful analysis on a regular basis to guarantee compliance with all State and Federal water quality standards.

The purpose of the CCR is to raise customer awareness about the quality of their drinking water, where their drinking water comes from, what it takes to deliver water to their homes and the importance of protecting drinking water sources.

The City has mailed its customers a printed copy of the CCR to comply with the Safe Water Drinking Act. Recently, the California Department of Public Health expanded its interpretation of the SDWA to allow for electronic delivery of the annual report. In an effort to be more environmentally responsible, as well as minimize printing and mailing costs, the City of Grover Beach has made a digital copy available for viewing and downloading on the City's website. To receive a printed or email copy of the report at no charge, please contact the Public Works Department at (805) 473-4530 or send an email to publicworks@groverbeach.org.

"The City of Grover Beach cares about the quality of drinking water we provide, and our Public Works Department employees work hard to provide all of our customers with drinking water that meets or exceeds the safety and quality standards set by the State and Federal governments," said Public Works Director Greg Ray. "One of the goals of the Grover Beach Public Works Department is to ensure the water system will continue to supply high quality and safe drinking water to all of our customers, now and in the future."
